Mark '+' when the horse has an edge in a particular area; mark '-' when the horse has a disadvantage.

After adding up the '+'s and '-'s, the horse which has the most net '+'s under Final View has the best chance of winning.

1ˢᵗ Step: Basic View

Form

Assess recent starts and trends by reviewing recent form

From the Last 6 Runs (left to right), we can find out whether a horse:

- Recently won or finished in first-3 position.

- Shows any trends from their recent starts (improving or declining form).

- If a horse did not finish in a first-3 position recently, or his trend is getting worse, his chance of winning is lower.

Assess the horses' chances of winning by reviewing recent form

Recent starts should be given higher reference values.

Very Good	Good	Average	Bad	Very Bad
Has won once or more	Results are improving in the last 3-4 races / Has finished in a first-3 position	Mostly finished between 4th and 6th	Mostly finished in 7th position or lower / Results are declining in the last 3-4 races	Mostly finished in 10th position or lower

For horse debuts in Hong Kong you should refer to overseas records, look at his breeding Sire/Dam/siblings record in Hong Kong, and check his recent barrier trials.

However if you only analyse and focus on form, and overlook other variables, your outcome is likely to be biased

For example:

- Even though a horse has won, or finished in a first-3 position, in recent races, he might not be able to overcome the challenge of a heavier weight or a rise in class.

- If a horse has not finished in a first-3 position in recent races, he might have been running over the wrong track and distance or started from an unfavourable draw.

- A horse might have a stronger form if his opponents in recent races have finished in a first-3 position after those races

2ⁿᵈ Step:
Assessing other key factors

Track and Distance

Running over the best distance is a big plus

Each horse's speed, stamina and strength are different; therefore most horses have their own best distance.

A horse who performs well over 1400-1600M may not have the speed required for a 1000M race, nor the stamina required for a 2000M race.

Example: DROMBEG BANNER

DROMBEG BANNER has won the races when running over 1400M and 1600M.

This means DROMBEG BANNER favours 1400M and 1600M but his performance over other distances might not be as good as over 1400M and 1600M.

Even over the same distance, our 3 different tracks have a big impact on a horse's performance

Sha Tin Turf

1800m 1600m 1400m 1200m

2000m 2200m 2400m 1000m

Sha Tin Dirt (All Weather)

1200m

1650m 1800m

Happy Valley

1000m 2200m

1200m

1800m 1650m
	Sha Tin Turf	Sha Tin Dirt (All Weather)	Happy Valley
Surface	Grass	Sand, clay and organic elements	Grass
Characteristics	Flat	Kickback may hit horses at the rear of the field	Up-and-down
Turns	Relatively moderate turns	Relatively moderate turns	Tighter turns
Length of Home Straight	430m	365m	312m – 338m

Performance should be compared over the same track and distance

Same track and distance consists of three elements:

- Same racecourse (Sha Tin / Happy Valley)

- Same track (turf / dirt)

- Same distance

A horse that performs well over 1200M at ST may not be as good over 1200M at HV because the two tracks have different characteristics.

Example: **WINNING DRAGON**

WINNING DRAGON has won over 1650M at HV track on 2 occasions in his last 7 runs, which proves he is good on this track; however, he could not finish in a first-3 position over 1600M at ST Turf track and 1650M at ST Dirt track .

Even over the same distance, the horse's performance on different tracks can be very different.

So we should pay more attention to WINNING DRAGON when he runs in a 1650M race at HV track.

Example: SMILING COLLECTOR

You can consider the horse's running style if there are no track and distance records for comparison.

SMILING COLLECTOR is a 'late-finisher' that always drop back to the rear, and then come from behind strongly in the home straight.

SMILING COLLECTOR performed well over 1400M with his come-from-behind running style; he should therefore be able to perform over longer distances such as 1600M.

On the other hand, he may not be suited to a shorter distance such as 1000M at ST.

Track Condition should also be considered

The condition of a turf track is described by the moisture level of the track surface.

Track condition is mostly affected by weather:

- Turf: Track condition is likely to be Good To Firm during dry weather or on sunny days; on the other hand, the track condition may change to Good To Yielding or even Yielding after rain.

- Dirt: Track condition may be at one of two extremes after rain; Wet Fast which indicates a solid surface, and Wet Slow which indicates a soft surface.

Each horse may perform particularly well over a specific track condition

LUCKY BANNER: He finished 1st over 1200M at ST Dirt track on Wet Slow. However, he performed less well over the same distance on Good. Therefore, Wet Slow may be his favourite track condition.

COLOURFUL PRINCE: He finished in a first-3 position over 1200M at ST Dirt track on Good. However, he could only finish 8th over the same distance on Wet Slow. Therefore, he maybe unfavoured racing on a Wet Slow track condition.

Summary:
Impact of Track and Distance

Factors to be considered	+	-
Is the horse running over his favourite distance?	Yes	No
Has the horse finished in the first-3 over the same track and distance?	Yes	No
If the horse did not run over the same track and distance, estimate from his running style whether he is suited to the track and distance of this race.	Suited	Not Suited

Jockey and Trainer

The best jockeys can raise a horse's chances of winning

A jockey's competence can be reflected in their ranking, Win% and First-3%:

- Z Purton and H Bowman are the top jockeys who have outstanding figures for Win% or First-3%.

- The best jockeys can recover quickly from difficulties such as a wide draw, a knock, or being blocked during a race.

- Z Purton and H Bowman are the good jockeys who can handle horses starting from an unfavourably wide draw.

Z Purton

H Bowman

So do not forget to check whether there has been a change of jockey

If there is a change to a better jockey, this will improve the horse's chances of winning, vice versa.

It's particularly noteworthy when there is a change from a lower-ranked jockey to a top-class jockey like Z Purton.

Also, pay attention whether the horse has finished in the first-3 with the jockey in this race.

Draw

In general, horses starting with an inside draw have a competitive advantage

However, a better approach is to study the draw by analysing it alongside a horse's favourite track and distance, and its running style.

Study the Win% and First-3% of each draw over each track and distance

Inside draws for 2000M at ST Turf and 1200M at HV have a particularly high Win%.

This is because there is a tight turn shortly after the start, requiring the horses with wide draws to run a longer distance to get closer to the rail.

	11	3%	14%
Outside	12	1%	4%

Season 2021/2022 to present

Exception: ST Turf 1000M Straight

Horses that start from an outside draw have a competitive advantage because there is less damage to the track by the Grandstand.

Impact of draw will be different according to a horse's running style

	Front-runner	Late-finisher
Running Position	1 - 1 - 1 - 1	12 - 11 - 1
Feature	A horse with good early speed, who likes to run from the front before the home straight	A horse with good stamina, who is better off restrained behind the horses in front

Starting with an inside draw has an advantage especially for front-runners

A front-runner starting with an inside draw will find it easier to lead in a race. This helps him to win.

However, if he starts with a wide draw, higher speed and more energy are required to get to the inside rail in order to lead. If the horse cannot get to the inside rail, he has less chance of winning.

9.TORONADO PHANTOM   7.BEAUTY CHARGE   3.LUCKY WITH YOU   5.PACKING TREADMILL   11.BEAUTY TYCOON   10.VICTOR THE WINNER

VICTOR THE WINNER has very good early speed and he should be able to get across and lead this field. BEAUTY TYCOON from his inside draw can get into the trail. TRILLION WIN likes to be on the speed and he will not be far away. ORIENTAL SMOKE has drawn the outside and he generally likes to go back when he draws wide. TORONADO PHANTOM also likes to go back and he should be at the rear of the field.

A late-finisher may have an advantage if he starts with a middle draw

A late-finisher who starts from a wide draw can still easily get closer to the inside rail and be restrained at the back of the field.

It's even better if a late-finisher starts from a middle draw (draw 5-10) because he will be less likely to be blocked and will more easily find space to accelerate in the home straight.

Pace: GOOD

The pace looks to have drawn wide in this race and ARIEL can come across and get to the rail first. RUN RUN BUDDY led from the outside draw at his last start and he can come across and join ARIEL in the lead. UNPRESUMING may be in for a tough run from his draw as he also likes to go forward. DINKUM can be positive from an inside draw and hold the trail. G LINER has no early pace so he is likely to be back towards the rear of the field.

Class and Weight

Why is weight reduced?
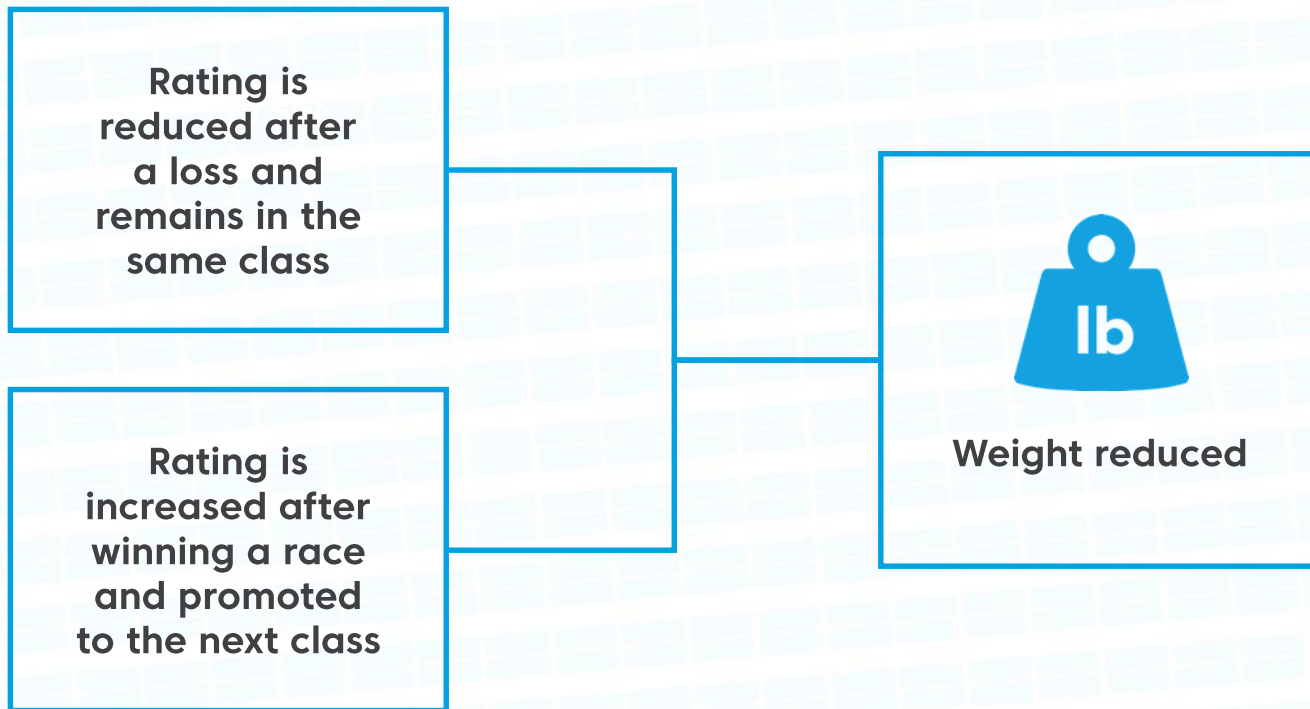

Rating is reduced after a loss and remains in the same class

Rating is increased after winning a race and promoted to the next class

Weight reduced

Analyse weight carried and chance of winning

Weight	Reason	Recent Start Results	First-3 Chance
Weight reduced	Weight reduced after a loss in the same class	Finished in a first-6 position	Higher chance
		Did not finish in a first-6 position	Lower chance
	Weight reduced after a win and is promoted in class	Won by 1 length or above	Higher chance
		Won by less than 1 length	Lower chance

For lighter horses (body weight below 1000 lbs), it is harder to carry a heavy weight.
So it is beneficial when lighter horses are promoted to the next class and carry less weight.

Why is weight increased?
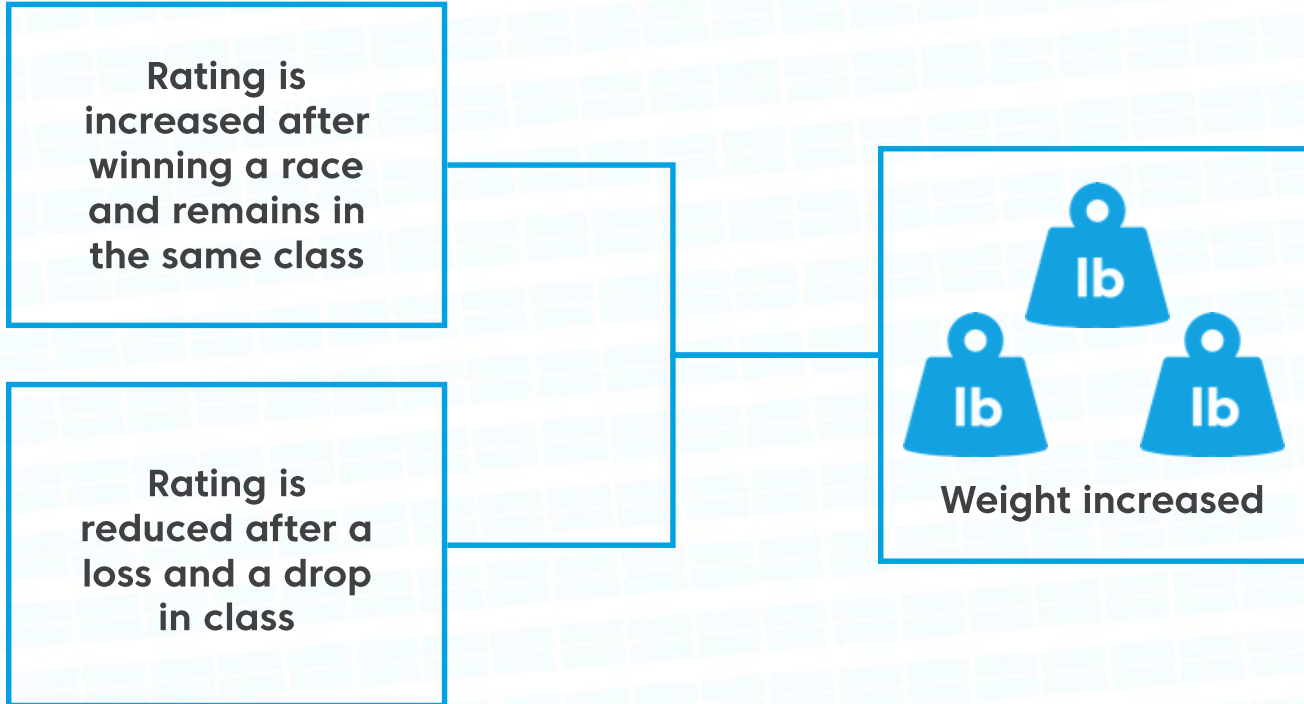

Rating is increased after winning a race and remains in the same class

Rating is reduced after a loss and a drop in class

Weight increased

Analyse weight carried and chance of winning

Weight	Reason	Recent Start Results	First-3 Chance
Weight increased	Weight increased after winning a race in the same class	Won by 1 length or above	Higher chance
		Won by less than 1 length	Lower chance
	Weight increased after losing a race and a drop in class	Finished in a first-6 position	Higher chance
		Did not finish in a first-6 position	Lower chance

Analyse his opponents in recent races and chance of winning

Performance of his opponents in recent races after those races	Value of form in recent races	First-3 Chance
Finished in a first-3 position	Stronger form	Higher chance
Did not finish in a first-3 position	Weaker form	Lower chance

Example: HIGH RISE SOLDIER

HIGH RISE SOLDIER had not won in any races from 2022 Dec to 2023 Mar.

However, HIGH RISE SOLDIER finished in a first-5 position in Class 3 races.

HIGH RISE SOLDIER won a Class 4 race in his last start. This reflects that he has an advantage over other Class 4 rivals, even if he needs to carry a heavy weight.

Summary:
Impact of Class and Weight

Factors to be considered	+	-
Did a weight reduced horse perform well in his recent start? For example: • Weight reduced after a loss in the same class, and finished in a first-6 position. • Won by 1 length or above and with a weight reduction after a class promotion.	Yes	No
Did a weight increased horse perform well in his recent start? For example: • Won by 1 length or above with weight added after winning a race in the same class. • Weight was added after losing in a race and a drop in class, and finished in a first-6 position.	Yes	No
Did his opponents in recent races finished in a first-3 position after those races?	Yes	No

Condition

A horse's weight can reflect his condition

If a horse's weight has risen or dropped by less than 20 lbs, his condition should be maintained at a similar level to his last start. Therefore, if he finished in the first-3 in his last start, his condition should be good.

Otherwise, compare his current weight to his weight range when he had a first-3 finish.

If the difference is less than 10 lbs, his condition should be good. Otherwise, his condition might have dropped.

Example: CAPITAL LEGEND

CAPITAL LEGEND's weight in his last start was 1103 lbs, which had decreased by 37 lbs.

His weight ranged from 1140 lbs to 1198 lbs when he had a first-3 position.

Since his weight is 37 lbs less than his lowest weight when he had a first-3 position, his condition may have dropped. Finally, He finished 12th in his last start.

Do not miss the horse parade

Good
Body: Firm flat stomach, well-toned muscles with solid lines, and strong neck
Manner/Appearance: Calm, relaxed with eager eyes
Gesture: Sprinter – active and excited; Stayer – calm

Bad
Edgy with heavy sweating
Bucking frequently which may waste energy

It is important to watch a barrier trial performance

Positive symptoms:

- The horse finished the barrier trial after a relaxed run without pressure.

- The horse continues to accelerate after the finishing line, showing he has a strong desire to win.

- The horse finishes close to other higher-rated horses, reflecting that he is in top form.

- The finishing time is much faster than another barrier trial over the same distance on the same day, reflecting that the horse has set a high standard.

7.GERALDINA 3.DANON THE KID

6.PROGNOSIS 2.DUBAI HONOUR 4.TOURBILLON DIAMOND 1.ROMANTIC WARRIOR 5.MONEY CATCHER

MONEY CATCHER is a noted leader and with no competition for the front he should easily lead this field. ROMANTIC WARRIOR can be positive and get into the trail. DUBAI HONOUR has the inside draw however he races well when he gets back so is unlikely to use it to his advantage. DANON THE KID can settle midfield from his outside draw. PROGNOSIS is a back runner so he should take up his usual position towards the rear of the field.

Fast pace benefits late-finishers

In a fast pace race, front-runners run too quick in the early stages and burn themselves out before the home straight. They are then likely to be overtaken by the late-finishers who still have energy.

10.CALIFORNIA DEEPLY   7.DINKUM   4.CRYSTAL POWERFUL   1.ATOMIC FORCE   9.SUPER AXIOM

SUPER AXIOM will use his good gate speed and get to the rail first. He is likely to be joined by SUPER COMMANDER who set up fast sectionals when winning his last start. ATOMIC FORCE has an inside barrier and should be able to use that and land in the trail. SUMMIT CHEERS will push forward however he may be trapped wide. PRETTY QUEEN PRAWN has an awkward draw and he may look for cover midfield.

Slow pace benefits front-runners

In a slow pace race, front-runners can maintain their leading positions easily throughout the race and at the same time save their energy for a late burst. However, late-finishers have to run even faster than the front-runners if they want to catch up from the rear.

2.FANTASTIC TREASURE   1.THE GOLDEN SCENERY   9.AMAZING VICTORY   7.THE ROCK   3.CIRCUIT STELLAR

CIRCUIT STELLAR led all the way last start and from a good draw can lead again. THE ROCK can be positive from his draw and get into a trailing position. BOURBONAIRE went forward last start at the same distance and he will be close to the pace. AMAZING VICTORY has the inside draw and he can be positive and be three back on the rail. FANTASTIC TREASURE has an outside draw so he should go back. ATULLIBIGEAL is back in distance and he should be towards the rear.

Other factors become crucial if it is a normal pace race

In a normal pace race, neither front-runners nor late-finishers have significant advantages or disadvantages.

SIGHT SUCCESS looks the likely leader in this contest from a good draw. WELLINGTON has good gate speed and he can use that and get into a trailing position. MASTER EIGHT has lost some of his early speed and he may sit in behind LUCKY SWEYNESSE although if he is quicker away those places may be reversed. COURIER WONDER has been going back in his races and he should do something similar in this race. SKY FIELD should go back as per normal.
