# Historical Draw Analysis

## Turf Track

A low draw number is an advantage especially if the race tempo is slow.

The faster the speed tempo the less advantage to low draw numbers in races over middle distances and further.

## Dirt Track

Because of tight and slightly banked turns, horses that come from off the pace are at a disadvantage.

A horse with early speed and a low barrier on dirt has the distinct advantage especially in sprint races.

# Horse

# Emotions

The horse is the most important factor in racing.

A horse maybe a champion or have the best form in a race, but if it does not feel or look 100% or is overly excited, the horse will not show its true ability.

Look closely for any tell-tale signs when a horse is walking around the Parade Ring.

Unhappy and worried:

Ears flattened against the neck

Content and interested in the surroundings:

Ears are pricked forward

Feeling Curious:

Both ears tilted forwards

In doubt or feeling uncertain:

One ear is pricked forward and the other held back

# Watch Horses Closely Going Down To The Start And Other Signs

Because ground conditions vary greatly in simulcast racing, it is important to look at a horse’s action when it goes down to the start.

Grass Cutter Action: If a horse keeps its front legs close to the turf and does not bend its knees, the horse will love fast or firm ground but will dislike soft/yielding ground as it can’t lift its legs up.

High Knee Action: If a horse lifts its front legs up high when going to the start, it will like soft/yielding ground but will dislike fast/firm conditions - the horse will not feel comfortable hitting turf hard.

Good
A horse walking around the Parade Ring or before the start who looks alert and relaxed.
Bad
A horse who is sweating (neck and body wet and showing white froth on body) and getting too excited means it is using up too much energy.
