

## 2022 Hong Kong International Sale

The Department of Veterinary Clinical Services has undertaken and reviewed extensive clinical, radiographic, ultrasonographic and endoscopic examinations of each Lot prior to and subsequent to import to Hong Kong. These examinations have been conducted in a forthright and transparent fashion. All images and recordings obtained and findings noted during these examinations are available for viewing in the repository at the Department of Veterinary Clinical Services.

These examinations have revealed imperfections. The veterinary surgeons from the Department of Veterinary Clinical Services have collaboratively assigned a relative risk to these imperfections. The relative risk is so categorised as;

- A. to be unlikely to represent a measurable risk of affecting the horse's future training or racing career, or
- B. to carry a low risk of affecting the horse's future training or racing career, or
- C. to carry a moderate risk of affecting the horse's future training or racing career, or
- D. not suitable.

Prospective purchasers are encouraged to seek a veterinary opinion on all the material available.

The following table summarises significant findings for each Lot from the entire veterinary examination process along with an appropriate risk category.

Lot No.	Sire	Dam	Region	Clinical Findings of Note and Risk Category	Height	Body Weight (lbs)		
						5-Jun (EUR) 9-Jun (AUS / NZ) 12-Jun (Lot 10)	20-Jun (Except Lot 10) 24-Jun (Lot 10)	7-Jul
01	Reliable Man	Oh So Royal	NZ	No significant findings. <i>Category A.</i>	16' 1"	1235	1260	1251
02	Lope De Vega	Gilded	GB	<i>Category D.</i>	16'	1054	1070	1078
03	Tavistock	Tempting Delight	AUS	No significant findings. <i>Category A.</i>	16' 2"	1207	1210	1217
